As a result of unavailability of tyres in size 15" with 2014 specification, only crews competing in Mediasport International Czech Rally Championship may use tyres with specifications from years 2013 and 2014 as in conformity with the decision of Czech Rally Commission. Crews using the 15" tyres with 2013 and 2014 specifications cannot take part in FIA European Rally Championship for Drivers and Co-Drivers, but only in Mediasport International Czech Rally Championship and will be lined up at the end of the starting field.

If the crew is intending to use these tyres, they have to notify organizer about this matter until Tuesday 26.8.2014, 21:00. Competitors cannot change their decision once its been made (e.g. exclusion from FIA European Rally Championship and transfer into the Mediasport International Czech Rally Championship).

Use of the 15" tyres in Mediasport International Czech Rally Championship

If the weather conditions are favourable, competitors will use tyres for dry track with 2013 or 2014 specification without any modifications, that is, as they are sold by the manufacturer (e.g. Michelin SA, Michelin R, Pirelli PA, Hankook Z209, Kumho CO3, Dunlop CR 311 etc.). If the Stewards of the Meeting enable cutting of tyres due to unfavourable weather conditions, competitors will use cut models of tyres mentioned above for the Mediasport International Czech Rally Championship. Alternatively, competitors may use 2013 model for a wet track (e.g. Michelin PA, Pirelli N3, Kumho TW 01, Dunlop A2, Hankook Z210 a Z213 etc.) These tyres may be also modified by cutting.
