

PRESS RELEASE No. 2

Barum rally chief Miloslav Regner: Vaccination is the right way

Preparations for the 50th anniversary Barum Czech Rally Zlín are in full swing. The organizers of this international car competition do not want to repeat the scenario from the previous year, when the rally had to be postponed to this year. The rapidly spreading Covid-19 disease took the hope of organizing the rally in 2020. The entire organizing team expects to run the event on August 27-29, 2021, when hopefully the global pandemic will be in decline - also thanks to the vaccination of the population.

Miloslav Regner, a long-time Clerk of the Course of the Zlín rally, celebrated his 70th birthday this year, and thanks to this fact that he was offered the opportunity to be vaccinated against coronavirus, which he used without hesitation. **"This year, the Barum rally is on the calendar again at the end of August, when the situation could be easier. We have enough time to prepare, however, vaccination against this disease is already being offered for selected groups, and I hope that it will soon reach the younger people as well,"** said Miloslav Regner and ensured that this year's Barum rally preparations are on the run.

"I've been used to injections since childhood, our generation has experienced it regularly. So I wasn't scared, there was no reason. I believe that vaccination will protect me at least from the heavy symptoms of the disease. Whenever possible, I'd like to see our fans in vaccination centres. I appeal to them to get vaccinated so they take part in all the activities around the Zlín rally. We want to organize the rally mainly for them. Without them, the Barum rally does not have the right atmosphere and its importance decreases very significantly," added Regner shortly after vaccination.

This took place on March 5 in the surgery of MUDr. Lubomír Nečas, who has also been the Chief Medical of the Barum Czech Rally Zlín for many years. He greatly appreciates Regner's activity. **"It is necessary to get as many citizens as possible vaccinated by the summer. Vaccination is currently the best way how to return to normal life,"** said MUDr. Nečas.
